### **RESTRICTION**

1. This application contains claims directed to the following patentably distinct species of the claimed invention: As shown by different figures and embodiments: species I (one embodiment) claims 53-58, 80; species II (another embodiment) claim 59; Species III (another embodiment) claim 60; species IV (another embodiment) claims 61-62, 81; species V (another embodiment) claim 63; species VI (another embodiment) claims 64-65, 82; species VII (another embodiment) claim 66; species VIII (another embodiment) claims 67-68, 83; species IX (another embodiment) claim 69; species X (another embodiment) claim 70, species XI (another embodiment) claim 71; species XII (another embodiment) claims 72-73, 84; species XIII (another embodiment) claim 74; species XIV (another embodiment) claim 75; species XV (another embodiment) claim 76; species XVI (another embodiment) claims 77-78, 85; species XVII (another embodiment) claim 79.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
